

Intelligent Design Creationism:

Why it is standard, anti-evolutionist special creationism

- 1. Misleading definitions of evolution: the straw man**
- 2. Distortion of commonplace scientific concepts: sowing doubt**
- 3. Incorrect, incomplete presentation of scientific evidence:
Undermining legitimate science to ridicule it**
- 4. Direct (but disguised) origin of ID claims in discredited,
frankly religious arguments of “scientific creationism”**
- 5. Illogical conclusion that alleged “evidence against evolution”
(99% of ID arguments) is evidence FOR “intelligent design”**
